FEEMASTER SMART
HOTEL PARKING MANAGEMENT SYSTEM

The Affordable Way To Make Your Car Park Pay

FeeMaster Smart provides a simple, cost effective means of managing revenue collection from car park users while simultaneously controlling parking access. The time-based system utilising Mifare RFID card technology is unobtrusive and easy to operate. It can be installed quickly with minimal disruption to staff and customers. Its modularity and flexibility makes it an ideal solution for a wide range of parking and general access control applications, enabling proprietors to collect an income from their car parking facilities while eliminating unauthorised parking.

Key Benefits

▶ **Security**
Hotel clients' vehicles can be parked securely in a barrier controlled environment

▶ **Eliminates Misuse**
Prevents the misuse of the car park by unauthorised users, ensuring that there are sufficient spaces for hotel guests and business delegates

▶ **Revenue Generation**
Flexible options for charging both short-term and long-term visitors for the use of the hotel car park

▶ **Access Control**
The system incorporates comprehensive access control features that can be used to manage access by staff, business delegates, gym/spa members, etc.

▶ **Integration With Hotel Door Locking Systems**
FeeMaster RFID cards can also be used with compatible hotel door locking systems

▶ **Taxi Drop-off Access**
Includes support for vehicles such as taxis entering the premises for pick-up and drop-off only
