Welcome to the Autumn edition of Nortech's eNewsletter. We hope you find the below articles interesting and informative. If you have any feedback or questions we'd be more than happy to hear from you on info@nortechcontrol.com

## Autumn Special Offer

### Place Your ANPR Orders Now to Save Money.

Looking for an ANPR solution?  Save money with our Autumn Special Offer - Nortech has already been successfully supplying Nedap's automatic number plate recognition camera to many of its customers as part of an access control system where they can use number plates as access control credentials.

As a late Autumn Special, all ANPR orders placed in November 2014 will receive a discount of up to 20% off our ANPR standard prices.

So why wait? call our sales office on 01633 485533 and see how much you can save.

## Nortech Events Diary

### Successful Security Twenty14 Autumn Show. …Now Looking Forward to NSI Installer Summit.

Following on from our successful first Security Twenty 14 Autumn conference in Heathrow, Nortech are looking forward to taking part in the NSI Installer Summit in Manchester on the 20th November.

The NSI conference seminars will be full of tips and advice on how the professional security and fire systems installer can stand-out from the crowd within this competitive industry. Installers can also get "hands on" with the latest kit and seek advice from the leading manufacturers including Nortech Control Systems.

We will be demonstrating Norpass3, our access control management software together with its integrated biometric solution and compact all-in-one ANPR system, an automatic vehicle identification solution that incorporates the camera, analyser and infrared illuminator.

## Product News

### Manage Your Visitors Efficiently and Cost Effectively.

The latest version of Norpass3 Access Control Software (Version 3.1) is due for imminent release. It includes a new facility for visitor management. It is ideal for those applications where visiting clients, supply vehicles, conference delegates, etc. are required to leave a secure facility within a fixed period and are issued with pass cards for use during their stay.

The new feature allows operators to issue cards with a short validity time (up to 24 hours) with just a few clicks.The card must be used to leave the facility within that time. If used together with Nortech's renowned MRC350 card capture reader, the cards can be captured on exit and recycled, making the whole process very cost-effective.

## Company News

### A Tasty End to a Long Glorious Summer

The Indian summer has been very well appreciated here at Nortech. We usually get together each month for a communal lunch, care of the company, so that we can catch up on the business is doing. With the extraordinarily good weather this September, we were all invited to a company barbeque for lunch on the 18th to take advantage of the last of the sunny weather. The management team took control of the cooking and treated us to an excellent 'fayre'.

We all had the opportunity to take in some sunshine and fresh air while tucking into good grub. It will give us something nice to look back on as the nights draw in.
